

AION

POWERED BY **GOOGLE AI STUDIO**
Run Gemini, Veo & Lyria directly with your free API key

Zero Subscriptions

100% Private

Free API Key

No Middleman

Build by Muhanad Sughayar · AI Developer & Automation Engineer · Available for Custom AI Projects

■ SNAP & BUILD SYSTEM — Your Superpower

■ Snap Vision

- Snip any part of your screen instantly
- Analyze bugs, docs, layouts in seconds
- Answers, translations, or fixes on the spot
- Batch-upload to ChatGPT, Claude, Grok
- Full page & region capture modes

■ Live App Builder

- Describe any tool in plain English
- AI writes the code & launches it live
- Build websites, games, calculators
- Real interactive code, one-click publish
- Live preview inside your browser

■ Quick Actions

- Build — generate a working app
- Research — deep web research
- Search — smart search results
- Read — summarise any page
- Code — write & debug code

■ THE CREATIVE SUITE — 4 Professional AI Studios

■ Veo 3.1 Video Studio

- Text-to-cinematic video generation
- High-quality sound auto-synced
- Multi-clip storyboard editor
- 16:9 / 9:16 / 1:1 aspect ratios
- AI director expands your brief

■ Broadcast Studio

- Any file or image → AI podcast
- Multi-voice talk show format
- Hosts: Zephyr, Kore, Fenrir
- Studio-quality audio output
- Custom scripts & formats

■ Nano Banana Images

- Photorealistic image generation
- Edit, upscale, create precision
- Professional studio quality
- Multiple styles in seconds
- Gemini Imagen models

■ Lyria Music Studio

- Compose studio-grade music
- Describe the "vibe" → full track
- Background music & soundscapes
- Google's Lyria model direct
- Unlimited creative generation

■ AUTOPILOT AGENT — 21 CDP Browser Automation Tools

click Trusted CDP click	type Smart text input	autofill Forms in 1 call	drag Real CDP drag/drop	navigate URL navigation	pressKey Key combos Ctrl+S	hover Reveal menus
select HTML dropdowns	waitForElement Async waits	readText Extract exact text	snapshotPage Deep DOM snapshot	exportPDF Any page → PDF	findElement Shadow DOM search	setMobileMode iPhone viewport
