

Your All-in-One AI Creative Studio — Powered by Google AI Studio

Built by **Muhanad Sughayar · AI Developer & Automation Engineer**

◆ 100% Free ◆ Zero Subscriptions ◆ Use Your Own Free Google API Key ◆ No Middleman

AION AI is a Chrome Extension that connects you directly to Google's most powerful AI models — Gemini, Veo, and Lyria — right inside your browser. Your API key stays with you. Your data travels directly to Google. We never see it, store it, or touch it.

● Snap & Build System

■ Snap Vision

Snip any part of your screen. Analyse bugs, documents, layouts, or images. Get answers, translations, and fixes in seconds.

■ Live App Builder

Describe any tool in plain English. AION writes the code and launches a working, interactive app inside your browser — websites, games, calculators — instantly.

■ Quick Actions

One-click commands built into every chat: Build, Research, Search, Read, Code, Continue. The fastest way to get things done.

● The Creative Suite — 4 Professional AI Studios

■ Veo Video Studio

Turn a text description into a cinematic video. High-quality sound auto-synced to the action. Multi-clip storyboard editor with 16:9 / 9:16 / 1:1 aspect ratios.

■ Broadcast Studio

Turn any file or image into a multi-voice AI podcast. Meet your hosts: Zephyr (The Host), Kore (The Expert), and Fenrir (The Creative).

■ Nano Banana — Image Studio

Edit, upscale, and generate photorealistic images with professional precision. Multiple styles and resolutions in seconds.

■ Lyria Music Studio

Compose studio-quality background music and soundscapes. Just describe the vibe — AION delivers a full track instantly using Google's Lyria model.

● Autopilot Agent — Real Browser Automation

Give AION a task in plain English and it executes it live in your browser using the Chrome DevTools Protocol (CDP). Real trusted clicks, real keystrokes, real results — not simulated events. Works on complex web apps, SPAs, and any site a human can use.

✓ Form Autofill

Fill entire forms in one call. Matches fields by label, placeholder, or name.

✓ Live App Building

Describe a tool, the agent builds and launches it in your browser.

✓ Web Research

Searches the web, reads results, and summarises findings.

✓ Read Page Data

Intercepts live API responses — reads prices, results, content directly from the source.

✓ Export Any Page to PDF

Saves any open web page as a PDF with one command.

✓ Shadow DOM Search

Finds hidden elements inside complex React/Vue apps that normal automation misses.

■ Privacy by Design

Your API key lives inside your browser only.
Data travels directly to Google — zero middlemen.
No AION account needed. We store nothing.

★ New Google accounts get \$300 in free credits from Google Cloud to explore Veo & Lyria.

■ Google AI Models — Direct Access

• Gemini — Text, code, reasoning & vision analysis

• Gemini Flash — Ultra-fast responses for quick tasks

• Veo — Cinematic AI video generation

• Lyria — Studio-quality music & audio

• Nano Banana (Imagen) — Photorealistic images

All models accessed directly via your own free API key.

● Technology Stack

Chrome Extension MV3	Google Gemini API	Google Veo	Google Lyria	Imagen / Nano Banana
CDP Debugger API	Flask + PostgreSQL	Google OAuth	Service Workers	Canvas + MediaRecorder
